Batch Information:

Batch Name: Web Development I

Teacher Name: Sumbul M.Saleem

Batch Code: 1603

Website Name: Master Chef Food and Drinks

Student Id: Raiha Jamal(55667) and Komal Noreen (55665)

- **Introduction:**

Purpose: Master Chef Food and Drinks website is designed for users to explore our diverse culinary offerings, view prices, and share their valuable feedback.

Objective: To provide users with a seamless and informative experience, allowing them to easily access pricing information, explore our delightful menu, and contribute their feedback to enhance our offerings.

- **Menu and Pricing:**

Purpose: Allow users to easily view the prices of our delightful food dessert and drinks options.

Objective: To present a transparent and user-friendly menu, showcasing prices for each item, empowering users to make informed decisions about their culinary choices.

- **Dessert Showcase:**

Purpose: Highlight our exquisite dessert offerings.

Objective: To entice users with visually appealing displays and detailed descriptions of our desserts, encouraging them to explore and appreciate the sweet side of Master Chef.

- **Feedback Form:**

Purpose: Encourage users to share their thoughts and suggestions.

Objective: To gather valuable feedback from users, enabling continuous improvement and creating a sense of engagement by incorporating user preferences into our culinary offerings.

- **Navigating the Website:**

Purpose: Help users easily navigate the website to find pricing information.

Objective: To provide clear and concise instructions, ensuring an intuitive user experience that allows users to effortlessly browse the menu, access dessert details, and find pricing information and give feedback.

- **Contact Information:**

Purpose: Provide a means for users to reach out with inquiries or specific requests.

Objective: To offer responsive customer support, building trust and facilitating communication for users seeking additional information or assistance.

COURSE OUTLINE

Before the making of this website we have learnt HTML and CSS Fundamentals. Following are the learning objectives and key points of our course outline.

Learning Objectives:
